

Kunal Pingle

Director – Power Electronics, Embedded Systems & Software Development

A multi-disciplinary engineer with deep expertise in electronics, embedded systems, and automation, Kunal has led technology development across medical devices, electric vehicles, enterprise systems, and industrial automation.

Qualifications:

- B.E. in Electronics & Telecommunication – University of Mumbai

KEY PROJECTS:

- Medical Equipment Development – high-precision electronics for healthcare applications
- Electric Vehicle Systems – power electronics, battery management, and embedded control
- ERP Systems & Inventory Automation – scalable enterprise software for operational efficiency
- Consumer Electronics & Industrial Automation – optimized embedded solutions for Manufacturing and retail

INDUSTRY EXPERIENCE & COLLABORATIONS:

- Johnson & Johnson Inc. – medical device innovation
- Redcell Inc. – electronics systems development
- Sapat International & Niravi Consumer LLP – consumer electronics and automation

PROJECTS

- PMV Electric – electric mobility solutions
- Instant Retail India Ltd. – retail technology integration

CORE COMPETENCIES:

- Power electronics & embedded engineering
- Full-cycle product design – hardware to software integration
- Enterprise software architecture (ERP, automation)
- Multi-industry R&D leadership
- Scaling prototypes to production-ready systems

RELEVANCE TO KROPBOOK:

Kunal's expertise bridges hardware innovation and software intelligence, enabling Kropbook to integrate IoT-driven soil testing devices, farm automation, and data systems seamlessly. His cross-industry experience ensures products are engineered for durability, scalability, and cost-efficiency, critical for rural deployment and global expansion.
